ICT on UQeMarket

IT Strategic Alignment
- Automation
- Standardisation
- Reduced complexity
- Reduced cost

Our IT Principles
- Be agile
- Continuously improve
- Be digitally-integrated
- Reduce complexity

What is ICT on UQeMarket?
ICT UQeMarket is focused on making commodity ICT products available for purchase through UQ’s eProcurement solution (UQeMarket).

Phase 1
- Existing AV and Desktop/Laptop suppliers transitioned to UQeMarket.
- Solution tested for the ICT context.
- Self-service experience to be developed.

The key deliverables are:
- Quoting through UQeMarket
- Dell punch out
- Self-service catalogues

Transitioning to an eProcurement approach for commodity ICT purchasing is a significant enabler of the UQ IT restructure that began in 2016 and is continuing in 2017.
This aligns with the eProcurement approach adopted more generally at UQ, whilst preserving controls where appropriate.
The aim of eProcurement is to deliver automation, encourage standardisation, provide end user choice, reduce quoting effort and time, reduce complexity and help reduce the cost of running IT.

Benefits include:
- Self-service purchases
- Quick quotes
- Shorter turnaround time
- Standard models
- Collective buying power
- Improved reporting
- Better spend analysis

Benefits

To date we have:
- On-boarded 7 suppliers to UQeMarket
- Implemented AV catalogues and UQAV internal store.
- Implemented Desktop/Laptop catalogues
- Piloted Desktop/Laptop orders through UQeMarket with Medicine
- Implemented a new approach to the IT Commodity Workflow
- Conducted an ITO seeking a preferred software supplier

Where are we at:
- Desktop/Laptop catalogues have gone live
- Negotiating Software Lifecycle Management Services
- Finalising Printer catalogues
- Determining Mobiles requirements
- Business Units reviewing IT Commodity role holders

Next steps:
- Pilot supply channel with software reseller
- Publish Printer catalogues
- Engage with Mobiles suppliers

Phase 1
- AV
- Desktops / Laptops

Phase 2
- Software
- Self-Service

Phase 3
- Mobiles
- Printers

Phase 4
- Market Testing
- Preferred Suppliers
- Other ICT products
